

## Invite the Sky Light Into your home

Many studies have shown the advantages of light on a persons attitude. Let's admit it, without light life would be cold, dreary, depressing, and we wouldn't have much to look forward to.

According to a report by the Rocky Mountain Institute in Snowmass, CO increased natural daylighting resulted in fewer days lost to absenteeism with fewer errors and defects. Another study on natural lighting by Canadian educators shows that exposure to natural light resulted in 3.5 fewer absentee days for students, the students had nine times less tooth decay and grew  $\frac{3}{4}$  of an inch more in two years.

Now with homes being built closer and closer together what better way to have privacy and still let light in than installing a skylight. They bring the outdoors indoors, conserve energy (saving you money) homes are brighter and cheerier than ever; yet wonderfully private.

With the benefits that study after study show you will know you are doing something good for you, your family and your pocketbook!
